

Cane Leg Support

Use it as a cane or a leg support

Product Number CLS-1090

At long last, a patented, FDA approved medical device developed to keep your leg in an elevated position when seated, made necessary due to an ailment, a permanent injury, or recovering from an operation. It will assist or treat the following:

- Leg • Hip • Knee • Ankle • Foot
- Knee Fusion • Ankle Fusion

The CANE LEG SUPPORT can be adjusted to accommodate any height, is very light weighing approximately 20 ounces. It is made of high impact ABS plastic and aluminum. The leg support will hold up to 100 lbs. and the cane will support up to 300 lbs.

The CANE LEG SUPPORT instantly converts to a standard cane to assist when walking and back to a leg support when seated. The CANE LEG SUPPORT does it all.

The CANE LEG SUPPORT user is able to sit for long periods of time whether it be seated at a desk, dinner table, in a doctor's office, on a couch, folding chair, in a library, theater and for any time a user requires his or her leg to be comfortably supported in an elevated position while seated.

The only Medical Product of its kind in the World
